

PLANNED PREVENTIVE MAINTENANCE PROGRAMS

Invest in a Preventive Maintenance Plan now to maximize the benefits of your building systems over their lifecycle.

With a Preventive Maintenance Plan and Program you'll avoid replacing equipment before it's absolutely necessary, and you'll ensure your systems and processes work at full efficiency, reducing downtime.

Our comprehensive Preventive Maintenance Planning process includes:

- A consultation to gather in-depth details about the building and its systems
 - A rigorous investigation of all systems and processes
 - A customized equipment list, schedule and task list
- Qualification and procurement services—if required

We have the expertise, experience, knowledge and long-term commitment to deliver exceptional services—our team of management professionals alone has over 100 years of experience within the construction industry.

We can also offer you:

Applicable Energy Reduction Incentive Programs
Building design and construction sustainability models—we have LEED Accredited Professionals (AP) on our Management Team

Contact us if you would like more information on how our Preventive Maintenance Planning and Program service can help your systems and processes work to full capacity.
